bentes utrumque terminos participantes
secundum eundem ordinem quibus
contrarium est de forma eorum ex
pergit quod possunt simul esse veras quod
possunt simul esse falsas ut quidam homo est
et aliquis homo currit Ergo
sequitur quod non solum plus
universali et plus negativa sit
contrarie quo ad legem particularis circula
tum quod quidem plus nova

per legem contrarium ut iste
duae nullus homo currit et iste
homo currit Et quidem duae

contrarium ut ille duae omnem
equum videt Petrus et nul
lum equum videt Petrus nam
ille duae participant utrosque
terminos secundum eundem ordinem

simul verae et non quod sint simul
falsae Secundo notandum quod
contrariae duae contrariae non possunt
simul esse verae sed tamen sunt falsae
est ista quod si hoc possunt simul esse
verae eadem duae contradictoriae possunt
simul esse verae quod est falsum et quod
per primam Secundum tamen quia quod
si plus universalis et particularis plus
negativa inter se contrariae essent
simul verae et tamen ad alteram
universalem sequatur particularis universalis
vel eius subalterna sequitur
quod illa particularis sit eadem
vera Contra tamen in omni quia

ante expositam utroque quidem dicere
omnis et si tunc plus universalis
et plus negativa utrosque terminos
participant utrosque contradictorias
opposites ad contrarie sunt simul
verae ergo duae contradictoriae
sunt simul verae sed aliquid quidem
non sequitur ad duas propositiones contra
rias esse simul falsas nam
hoc particularis affirmativa sequitur
ad utramque universalem vel eius sub
alternam tamen non quod si plus universalis
sit falsa particularis de universali contra
ria ante expositam falsa tamen sequitur
quidem verum Dubitatur quod
vero possibile sit duas propositiones contra
rias simul esse falsas in materia
naturali Ad dubium dicendum
quod impossibile est duas propositiones sic
in materia contrarias de messe et
de parte de predicatione dicenda secundum
illam secundum sequitur quod sit contrarie
simul esse falsas in materia naturali
patet aliud quia si non de oppositis
sequitur quod duae contradictoriae sunt
simul esse falsae consequens est falsum
et contra probatum propositum patet
quia quod utrumque de per se probatum
verbis particularis et universalis sub al
terne de hoc esse de parte et
de predicatione dicenda equivalens
sic quod plus universalis et plus
negativa inter se contrariae opposi
tae in materia naturali sunt simul
falsae et tamen particularis universalis
equivalent contradictorie apparet sic
quod contradictoriae sunt simul falsae

quia patet quod illa particularis falsa
et plus negativa participant
secundum eadem contradictoriae requisitas
ad contrarium propositionum Et dicebatur
notatur in conclusione
de messe quia possibile est
duas propositiones contrarias in materia
naturali esse simul falsas ut
iste sunt simul falsae omne
corpus animatum est de deum
et nullum corpus animatum est
de deum Secundo dicebatur no
tatur de parte quod si propositiones

animal notum est Secundum
quod illa omnis homo fuit animal
inde casus sit falsa patet quia
per quod est homo non fuit

Circa istam litteram est notandum
quod propositiones duae particulares
legem subcontrariarum quae sic se
habent quod sunt propositiones habentes utros
que participantes secundum eundem
ordinem quibus contrarium est de
forma eorum exprimitur quod sint

simul falsae ut aliquis homo currit
aliquis homo non currit. Secundo no-
tandum quod licet quaerere quod
duae subcontrariae non possunt esse
falsae, sed bene simul verae et ita
quia si duae propositiones subcontrariae essent
simul falsae sequeretur quod duae
propositiones contradictoriae possunt simul esse falsae
quod est falsum et contra probatur
Nam ex quo particularis affirmativa
et particularis negativa inter se
subcontrariae essent simul falsae
et cum particularis affirmativa
sequatur ad universalem affirmativam tunc
illa universalis affirmativa esset falsa
quia quod est falsum non sequitur
ad antecedens verum tunc
sua universalis affirmativa et particularis
negativa utroque termino participantes
eisdem conditionibus requisitis
ad contradictionem sunt
simul falsae. Sed illud in
convenit non sequitur ad
duas propositiones subcontrarias
simul esse veras. Nam licet
particularis affirmativa sequatur
ad suam universalem
affirmativam
tamen non oportet quod si
particularis est vera quod
eius universalis sit vera
quia ex vero sequitur bene
ad falsum et per eandem declarationem
quod duae contradictoriae
non simul verae vel hoc quod
particularis affirmativa sequitur
ad universalem affirmativam eius
subalternam ita eadem

possit declarari quod particularis
negativa sequatur ad universalem
negativam eius subalternam.
Dubitatur primo utrum
possibile sit duas propositiones sub-
contrarias simul esse veras in
materia naturali. Ad dubium
respondetur primo declarando quod impos-
sibile est duas propositiones inter se
subcontrarias demonstrare et de-
... et repugnancia dicta simul
esse veras in materia naturali
propter quia si sic sequeretur
quod duae contradictoriae possunt simul
esse verae quod est falsum. Ex quo
quia quod in materia naturali particularis

equipollentia est equalitas etc.

Contra illa regula est non equipollencia
tunc iacet in vero est primum sequitur
quod nulla equipollent propositio contradictoriis sed
sic exponuntur ergo date duabus propositionibus
contradictoriis [illegible] si uni
earum propositionum negacio negationis

erit necessario et propositio cui propositio
est negatio equipollet propositioni cui ita
propositioni cum propositio necessario contradicebat
primo talis affirmatum contradicit propositioni
propositioni cum additur necessario ergo
non est verum dicere quod contra
tota propositio propositionum negationem

et propositio illa cum contra negationem
et qua alia contra equipollet
contradictoriis partibus contrarie autem
contraria est negatio equipollet
quoniam contraria alia et qua alia

[illegible]

Iste est septimus tractatus Petri Hispani [illegible] liber in quo auctor determinat de sophisticis elenchis qui in nobis fiunt et quid [illegible] sophisticis. [illegible] tractatus [illegible] primo auctor ponit [illegible] quia [illegible] quod sit elenchus [illegible] elenchus est argumentatio probatio [illegible] contradictionis [illegible] positiones [illegible] [illegible] quo patet quod ad elenchum requiruntur [illegible] quod [illegible] est quod sit argumentum [illegible] propter elenchus esse [illegible] requiritur quod sit probatio [illegible] et quae [illegible] [illegible] non sunt elenchi [illegible] [illegible] non est elenchus [illegible] non [illegible] magis [illegible] quod [illegible] argumentum [illegible] contradictionis [illegible] [illegible] quo patet quod ad unum elenchum requiruntur [illegible] requisite ad argumentum [illegible] requisite ad [illegible] contradictionis [illegible] non [illegible] elenchus [illegible]

Elenchus est sillogismus

[illegible] auctor ponit [illegible] quod elenchus sophisticus est argumentum [illegible] apparens probativum contradictionis [illegible] [illegible] quo patet quod [illegible] elenchum sophisticum [illegible] est apparens probatio contradictionis

[illegible] non esset elenchus sophisticus [illegible] quod [illegible] est defectus [illegible] contradictionis [illegible] non esset elenchus sophisticus [illegible] patet quod [illegible] est in elencho sophistico [illegible] apparentia et defectus [illegible] elencho sophistico est observatio [illegible] contradictionis vel aliquarum conditionum requisitarum [illegible] elenchus [illegible] defectus est non observatio [illegible] requisitarum ad unum elenchum.

Sed dubitatur utrum aliqua decentia possit esse elenchus sophisticus [illegible] non [illegible] quod [illegible] est [illegible] aliqua [illegible] est [illegible] non est [illegible] [illegible] est [illegible] [illegible] contradictionis [illegible] et est ibi elenchus sophisticus [illegible] quo [illegible] probat [illegible] [illegible] elenchus quia est [illegible]

Dubium esse verum:

[illegible] auctor ponit [illegible] sophistica [illegible] quod [illegible] est sophistica [illegible] sophistica [illegible] est [illegible] sophistica [illegible] est [illegible] sophistica [illegible] falsum est [illegible] est falsa [illegible] est [illegible] sophistica [illegible] est [illegible] sophisticas et [illegible] quo patet quod [illegible] est [illegible] sophistica [illegible] est [illegible] sophistica vel [illegible] sophisticas [illegible] est [illegible] obtineat [illegible] [illegible] sophistica [illegible] sophistica est ars [illegible] obtineat [illegible] sophistica [illegible] non obtineat

[illegible]

In ista parte auctor ponit diffinitionem [illegible]

[illegible]

... illa disputatio est temptativa

[illegible]

apparens est metra quia ab [illegible] ad alterius metra [illegible] ad alterum illarum [illegible] apparens metra et non existens non est metra [illegible] metra non potest [illegible] metra operante [illegible] apparens [illegible] quod est [illegible] illorum stat [illegible] metra et forte [illegible] stat quia [illegible] fallacie et cetera

Dicitur autem post diffinitionem fallacie [illegible] quod fallacia est deceptio [illegible] [illegible] [illegible] fallacia est decepcio [illegible] sophistice [illegible] sophistica et ista est diffinitio talis fallacie [illegible] fallacie [illegible] fallacia est [illegible] [illegible] fallacie [illegible] fallacia est deceptio quia [illegible]

cadit fallacia esse in dictione et dicitur secundum divisionem causas apparentiae. Et quia paralogismus secundum divisionem causas apparentiae est in dictione et dicitur. Ideo ulterius videtur quod ipse innuit paralogismum sive fallaciam vel paralogismum secundum divisionem causas apparentiae non causas divisionis et compositionis utrumque cum illo esse. Sequitur. Sit autem et cetera.

In ista parte autor determinat de fallacia dictionis, primo quod quae est una fallacia actualis et simul potentialis et fantastica ... multiplex actualis est dictio vel oratio ... [illegible]

[illegible]

Propositio est oratio affirmativa alicuius de aliquo
vel negativa alicuius ab aliquo. Terminus est in quem
resolvitur propositio ut subiectum et predicatum. Dici de omni est quando
nihil est sumere sub subiecto de quo non dicatur predicatum ut
omnis homo est animal quia est predicare de omni homine et nihil est sumere sub
homine de quo non dicatur animal. Dici de nullo est quando nihil
est sumere sub subiecto a quo non removeatur predicatum ut
nullus homo est lapis quia est removere lapidem ab omni homine. Syllogismus
est oratio in qua quibusdam positis et concessis necesse
est aliud sequi per ea que posita sunt ut omne animal est substantia
omnis homo est animal ergo omnis homo est substantia. Hic tota est oratio in qua
quibusdam positis et concessis duabus premissis sequitur
necesse est sequi aliud scilicet conclusio. Dicitur autem
